Breakout Sessions

8:30 AM - 9:20 AM	BREAKOUT SESSION (Boca V & VI)
8:30 AM - 9:20 AM	DELL - PREMIER SPONSOR SESSION (Boca I) <u>INTEL-POWER IoT SOLUTIONS WITH DELL TECHNOLOGIES</u> Intel-powered IoT solutions with Dell Technologies brings the power of the data center to the edge, enabling organizations to process and analyze data much faster and extract actionable, real-time insights they can use immediately. As the leader in advanced computing and analytics that power the entire IoT—at the edge, in the network, and in the cloud—Intel and Dell are helping Education achieve the full potential of the IoT, transforming industries, and creating a more intelligent world. Drawing on our expertise in IT innovation and embedded computing, we deliver products, solutions and services for the entire IoT. Partners and developers working on IoT solutions with Intel & Dell benefit from an extensive portfolio of IoT

assets and resources, plus advanced capabilities such as artificial intelligence, machine learning, and computer vision.

8:30 AM - 9:20 AM

ESCAMBIA COUNTY SCHOOL DISTRICT (Boca II)

ROUND-TABLE DISCUSSION ON SHARING STANDARDS-BASED MASTERY DATA

"Are you interested in sharing standards-based mastery data between learning tools and your SIS or LMS? If so, join the conversation to share solutions you've done or barriers you are trying to overcome."

Facilitator: [Tom Ingram](#)

8:30 AM - 11:20 AM

FCITL MEETING (Boca VII & VIII)

FCITL MEETING

8:30 AM - 9:20 AM

NORTHWEST REGIONAL DATA CENTER - FSU (Boca III)

CLOUD STRATEGY DEVELOPMENT

Join us as we lead a discussion on developing a Cloud Strategy. In this session, we will discuss questions organizations ask themselves and us as they begin to define or improve their cloud approach.

Presenter: [Matt Stolk](#)

Co-Presenter: [Geoff Burda](#)

9:30 AM - 10:20 AM

CHIPOLA COLLEGE (Boca IV)

IT LESSONS LEARNING FROM HURRICANE MICHAEL

The good news = we survived a CAT5 hurricane and our data center was not affected. The bad news = we had no phone or internet service for weeks after the storm. Although we had cloud services, we still found some gotchas that you might want to consider when prepping for disaster scenarios.

Presenter: [Matthew White](#)

9:30 AM - 10:20 AM

CoSN (Boca V & VI)

Cybersecurity Intro

Protecting the digital life's of those in our care is a critical part of our daily work, to do this effectively we all need new life skills and ways to approach the problem. In this engaging session Ryan Cloutier Principal security architect and CISSP® will equip you with the new skills and approaches you need to increase your ability to protect data and the humans who that data belongs to and how to effect immediate change in your schools, community's and cybersecurity programs.

Presenter: [Ryan Cloutier](#)

9:30 AM - 10:20 AM

EDUCATION NETWORKS OF AMERICA - CONTRIBUTING SPONSOR SESSION (Boca I)

Protecting Your Data in the Digital Age: Risk Management and Cybersecurity Strategies

As the size and scope of your network continues to grow, attacks from cyber criminals are exponentially on the rise. Short-handed IT staffs, an escalating number of interconnected devices, and the value of student data on the dark market make education a uniquely vulnerable and targeted industry for hackers. In the age of sophisticated cyberattacks and internal security threats such as human error and privilege misuse, school districts can no longer rely on traditional methods of cybersecurity for network protection. Join this session to hear a former FBI agent and cybersecurity expert discuss the top cybersecurity threats facing school districts today. They will also share cybersecurity best practices and provide audience members with risk management procedures and policies school districts can implement to help keep their networks (and data!) safe and secure.

Presenter: [Colleen Hoy](#)

Co-Presenter: [Stacy Arruda](#)

9:30 AM - 10:20 AM

Layer 3 Communications - CONTRIBUTING SPONSOR SESSION (Boca II)

1. Synthetic Testing End-User Experience

When you get the end-user call "why does this not work". What is really more important to understanding; is it your network or the dreaded "pilot error?"

The ability to replicate a client's application experience provides the statistics and analytics that can rapidly identify infrastructure problems and provide the data to resolve them. Multiple sensors deployed across a WAN gives visibility into local or wide-spread issues.

2. Empowering Search Visibility

Empowering authorized stake holders to verify end user search request, without having to engage the technology team.

The ability to provide insight into user search behavior is extremely beneficial. Search visibility has extensive reporting capabilities and supports proactive alerting. In the education market this tool can be particularly powerful. For example, a district administrator might set up his/her dashboard to see a daily report on searched in the STEM place, or a particular

principal might use the tool to get an alert if any student in the school searches on a keyword such as “guns” or “drugs.”

Presenter: [Paul Gallogly](#)

Co-Presenter: [Brad Goodman](#)

9:30 AM - 10:20 AM

SEMINOLE COUNTY PUBLIC SCHOOLS (Boca III)

COHORT DASHBOARD

Demonstrating an app we created using Power BI that allows our school administrators to monitor their High School cohort data. The app pulls data from our students system and refreshes in real time as users make updates. We can analyze progress of programs, trends from multiple years, and estimate the Grad rate at the school and district level

10:35 AM - 11:25 AM

INNIVE, INC. - CONTRIBUTING SPONSOR SESSION (Boca I)

Leveraging Your District's Data To Produce Successful Outcomes

School districts have a plethora of digital resources and tools they are using to enhance instruction, increase efficiencies, and optimize student performance. However, with great power comes great responsibility. The surge of data created by these new tools and devices can be overwhelming and difficult to manage, rendering it difficult for districts to leverage these analytics to their full benefit. Join Jeremy Bunkley, the Director of Information Technology Services at Florida's School District of Clay County as he shares how his team is effectively tracking the tools and applications his students and teachers are using on their devices to optimize and safeguard their learning environments. He'll also discuss how Clay is using technology to make data-informed decisions, identify trends, and inform professional practices.

Presenter: [Oliver Landow](#)

MONDAY LUNCH and GOOGLE FOR EDUCATION KEYNOTE - JAIME CASAP, EDUCATION EVANGELIST (Caribbean Ballroom I & II)

Jaime Casap, Education Evangelist

Jaime Casap is the Chief Education Evangelist at Google. Jaime evangelizes the power and potential of technology as an enabling and supporting tool in pursuit of promoting inquiry-based learning models. Jaime collaborates with school systems, educational organizations, and leaders focused on building innovation into our education policies and practices. Before he joined Google 13 years ago, Jaime spent seven years as a strategy and organization consultant at Accenture, where he worked with companies in financial services, government, utilities, healthcare, and electronics and high tech.

In addition to his role at Google, Jaime serves as an advisor to dozens of organizations focused on learning and the future of work. He is the coauthor of "Our First Talk About Poverty," as a way to talk to children about poverty. Jaime also teaches a 10th grade communication class at the Phoenix Coding Academy, and guest lectures at Arizona State University. He speaks on education, digitalization, innovation, generation z, and the future of work at events around the world. You can follow and reach him on Twitter at @jcasap

The Speed of Learning We are living in extraordinary times. As the world gets more digitalized, it also gets more complicated. Learning can happen faster today than at any time in history, and this is both exciting and critically important to get right. The idea of "lifelong learning" has been around for a generation, but we haven't ever really put in practices to make this idea a reality. Today, not only do we have the tools and technology to bring this idea to life, our students will not survive the future with the ability to learn new skills continually. In my session, I explore these ideas and make a case for the ability to learn as the most important skill students need to master.

Keynote Speaker: [Jaime Casap](#)

Breakout Sessions

1:15 PM - 2:05 PM

CLASSLINK - CONTRIBUTING SPONSOR SESSION (Boca I)

Baker County Schools: How ClassLink Increased Efficiency in a Climate of Limited Resources

ClassLink, known as a single sign-on provider, continues to innovate and has become an end-to-end enterprise solution that meets the needs of IT, curriculum, students, teachers, staff, and district leadership. Baker Public Schools has been using many of the tools in the platform, which has greatly impacted operational efficiency, and provided superior service to

the end user. ClassLink has saved valuable time in the IT department, allowing them to focus on other pressing issues.

In addition to the well-known Launchpad (which utilizes open standards) and File access portals, Baker has found the ability to measure ROI for applications with the new enhanced Analytics, which measures app launchers from school and at home, compares schools side by side, tracks time on task, and allows the district to enter cost to determine real costs per application. This has allowed the district to make decisions around little used applications. The ClassLink Roster Server supports the OneRoster® file format as well as the Ed-Fi® dataset. The ability to parse and export files via CSV or ReST API to publishers has been a time saver and allows data privacy and security to remain intact.

Newest from ClassLink is the OneSync product which provisions users into AD, Google, and O365/Azure in an easy to use GUI interface without the need to create or manage complex scripts. For those manually managing AD, the addition of this product into our suite is a game changer.

BRIDGING DEPARTMENT GAPS TO PROTECT OUR STUDENTS AND TEACHERS ONLINE

Do you know where ALL of your data are going? In the digital culture, online and offline worlds intersect across all areas of our lives. For students, this means what happens at school appears online, and what happens online appears at school. To achieve and maintain safety, educators must work together to protect students as they navigate learning in 21st century environments. At Seminole County Public Schools, key district leaders create bridged relationships across departments to focus on educator learning, including digital safety. Session attendees will learn tactics for breaking down silos created by traditional roles within district staffing models. Attendees will leave with valuable strategies to strengthen our greatest system vulnerabilities, our end users, through professional learning targeting phishing, cyber security, and data privacy.

NETAPP - CONTRIBUTING SPONSOR SESSION (Boca I)**Hybrid Cloud Infrastructure (HCI) – Command Your Clouds and Drive your IOT Strategy Forward**

Broad adoption of public cloud has set a new bar for the IT experience that enterprise users are now demanding. This has put enormous pressure on IT leaders to leverage the agility, scale and services of public clouds and deliver a similar breadth of services and experiences from on-premises environments. Regardless of location and regardless of infrastructure, the consumption experience that customers are now familiar with from public cloud providers is driving the decisions and spending of today's IT leaders.

A hybrid multi-cloud experience, delivered by the NetApp Data Fabric and hybrid cloud infrastructure, empowers you to command your clouds, meeting the demands of your users

and your enterprise, to drive your IOT strategy forward. In this presentation you'll learn how to thrive with data and deliver a hybrid multicloud experience with frictionless consumption, self-service, automation, programmable APIs, and infrastructure independence, at scale.

TUESDAY LUNCH and KEYNOTE - KEITH KRUEGER - CoSN (Caribbean Ballroom I & II)

Keith Krueger-CEO CoSN

In 2016 Technology & Learning selected him as one of the "big 10" most influential people in ed tech and the Center for Digital Education identified him as a Top 30 Technologist/Transformer/Traillblazer. In 2008 he was selected by eSchool News as one of ten people who have had a profound impact on educational technology over the last decade. In 2016 he received a Special Recognition award from the Council of Great City Schools. He serves on many Advisory Boards including the Friday Institute at NC State University, the Public Police Advisory Council for the American Library Association, previously the Education Committee of the National Park System and past Board Member/Treasurer of the National Coalition on Technology in Education & Training. He has served as a co-principal investigator of the highly regarded Horizon K-12 emerging technologies report for years. Keith has a global reputation as a key thought leader and has organized senior level U.S. delegations to visit Australia, Asia, Europe and South America to examine best practice in ICT in education.

In fall of 2015 Keith conducted a Work Study on Digital Equity as an Associate in Practice at Harvard's Graduate School of Education. As a Certified Association Executive, he has extensive background in nonprofit management and has a Masters from Humphrey School of Public Affairs at the University of Minnesota.

Predicting Inventing the Future of Learning

One of the best ways to think about the future of learning is to start by inventing the future you desire. Explore how visionary leaders can design the future of teaching and learning by leveraging emerging technologies. Hear what leading global experts from the new Driving K-12 Innovation initiative feel are the key trends accelerating technology in education, the accelerators shaping ed tech and the most important technology trends today for learning. Finally, peek into our crystal ball and see what key trends and technologies, including findings from CoSN national surveys on infrastructure and IT leadership, that you need to understand and leverage if we are to more personalize learning going forward.

2:15 PM - 3:05 PM

CONTENTKEEPER - CONTRIBUTING SPONSOR SESSION (Boca I)

K-12 Web Filtering – To Cloud or not to Cloud. That is the Question!

Many school districts are considering the move to cloud-based web filtering as an alternative to gateway filtering. In this process they are discovering a significant sacrifice of important functionality required to meet their filtering and reporting goals. IT departments are being asked to safely open access to more educational content, provide age appropriate policies, receive meaningful URL reporting/alerting, achieve a consistent experience across all devices/browsers, filter 1:1 mobile devices and prevent filter circumvention. Attend this session to learn about the real difference between cloud and on-premise filtering technologies for schools.

Presenter: [Matthew Dillinger](#)

THE CHANGING ROLE OF THE DISTRICT TECH LEADER

Educators, school board members and parents agree that education will be increasingly delivered digitally, and that offers the potential to more personalized learning. The district technology leader/CTO is an integral part of how education systems adapt and change to meet that growing technological need. Learn about CoSN's™ Framework of Essential Skills for the CTO. Find out which skills that are necessary for you to take yourself to the next level. Preview the body of knowledge for a new national certification (CETL) program.

Presenter: [Keith Krueger](#)

2:15 PM - 3:05 PM

FOCUS SCHOOL SOFTWARE - CONTRIBUTING SPONSOR SESSION (Boca II)

Protecting Student data while improving Communication about student discipline, attendance and performance through Focus SIS.

Focus understands the need to increase communication with parents and students as well as communication between teachers and administration. This sharing of information needs to happen without risk of information being shared with those without "the need to know". This session will provide an overview of Focus tools to improve communication with administration and teachers as well as the school communication with parents and students. We will discuss the use of teacher-based classroom referrals and the controls for the escalation process to administration. We will demonstrate our Tardy Tracking and the Kiosk for checking in and out of school (as well as various office locations) which can integration with portal messages, emails and texts to parents and/or students. The Focus re-enrollment process provides an avenue for collecting beginning of the year information electronically. The session will also cover permissions and preferences for protecting student information.

8:30 AM - 9:20 AM **CoSN** (Boca II)
MOVING FROM PRIVACY TO TRUST
Data privacy is a growing priority for educators, parents, policymakers and other stakeholders. It is the responsibility of all school system leaders to create more trust around the use of student data to improve learning and teaching. Learn how school districts can balance technology advances with the need to protect student privacy. Join this interactive session about creating a trusted learning environment and learn about a new, voluntary Trusted Learning Environment seal.
